

A bedtime story about a heart that is big enough for two houses. Sam has two homes and a small heavy question, which one is real, and did he cause the one house to become two? A gentle, honest story that does not pretend the family changes back, but tells a truer, kinder thing: home was never the house, it is the love you carry with you, none of it was your fault, and a heart is big enough for two homes. From The Little Rewrites.
