THE BYLINE METHOD

Ghostwriting that works doesn't sound ghostwritten. It sounds like the person — on their best day, with an editor in their head. Most ghostwriting fails at exactly this point. It's competent and generic. It could be anyone. And the moment a reader thinks "this doesn't sound like them," the trust is gone.

The whole craft hinges on one thing nobody documents: how you capture a voice and then write inside it so faithfully that the person reads their own piece and says "that's exactly what I would have said — I just couldn't get it out."
