SCAN TO REVIEW

INSTALLING IT

- 01 Gmail, Outlook or Apple Mail: open **mk-parrish-signature.html**, select all, copy, paste into the signature box.
- 02 Momentum CRM: paste **mk-parrish-signature-crm.html** into the editor's source view (the < > button), not the visual editor.
- 03 Save, reopen the signature to confirm it survived, then send one test to yourself and open it on a phone as well as a desktop.
- 04 The star, heart and QR load from mkparrish.com/email/ and appear once that deploys. In the CRM you can upload all three through the editor's own image button instead.

Generated by `npm run email:signature` — edit `scripts/build-email-signature.mjs`, never the HTML.
