

You are not behind. You are becoming. A reflective memoir for anyone measuring their life against a clock they never chose to wind. Weaving Stoic philosophy, Kierkegaard, Nietzsche, Frankl, and Rilke together with the research on the social clock, comparison, and impermanence, *The Meantime* takes apart the myth of falling behind and rebuilds it into peace: the quiet, strategic patience of a life that is temporary, already moving, and — in a time that is not the clock's time — falling into place.

THE MEANTIME

*A memoir on society's clock, the
myth of falling behind, and
finding peace while everything
quietly falls into place.*
