PROFESSIONAL SUMMARY

Senior B2B marketing and partnerships leader with nearly two decades growing revenue across SaaS, cloud communications, media, consulting and manufacturing. I build the go-to-market engine end to end: positioning and messaging, partner and channel programs, account-based marketing and demand generation, sales enablement, and the reporting that ties it all to pipeline. At Ericsson (Vonage) I scaled EMEA partner programs from launch to $200M+ in influenced revenue, raised enterprise win rates 15% and shortened sales cycles 30%. Today I run an AI-native consultancy and sell full-cycle myself, so I plan like a marketer and close like a seller.
